ATTN: Mr Daniel En Quan Lim

CLASS 1 ACTIVITY PERMIT FOR ANDES CONSULTANTS PTE LTD TO OPERATE UNMANNED AIRCRAFT AT THE SPECIFIC LOCATION(S) SHOWN IN ANNEX A, ON THE SPECIFIC DATES, TIMES AND OPERATING ALTITUDE AS LISTED IN TABLE 1

Pursuant to Regulations 9, 15 and 16 of the Air Navigation (101 – Unmanned Aircraft Operations) Regulations 2019, this Class 1 Activity Permit is granted to Andes Consultants Pte Ltd ("the Operator") to fly 1 unmanned aircraft (Model Type: DJI Matrice 30, DJI Mavic 3) for Aerial photography/ Videography at the specific location(s) shown in Annex A, on the specific activity dates, times and operating altitude as listed in Table 1 below, subject to its compliance with the conditions listed in this Permit.

Activity Date	Activity Time	Operating Altitude
06 December 2025 to 07 December 2025	0830LT to 1830LT	183 ft above mean sea level (AMSL)
13 December 2025 to 14 December 2025	0830LT to 1830LT	
20 December 2025 to 21 December 2025	0830LT to 1830LT	
25 December 2025	0830LT to 1830LT	
27 December 2025 to 28 December 2025	0830LT to 1830LT	
01 January 2026	0830LT to 1830LT	
03 January 2026 to 04 January 2026	0830LT to 1830LT	
10 January 2026 to 11 January 2026	0830LT to 1830LT	
17 January 2026 to 18 January 2026	0830LT to 1830LT	
25 January 2026	0830LT to 1830LT	
31 January 2026	0830LT to 1830LT	
01 February 2026	0830LT to 1830LT	
07 February 2026 to 08 February 2026	0830LT to 1830LT	
14 February 2026 to 15 February 2026	0830LT	

	to 1830LT	
17 February 2026 to 18 February 2026	0830LT to 1830LT	
22 February 2026	0830LT to 1830LT	
28 February 2026	0830LT to 1830LT	
01 March 2026	0830LT to 1830LT	
07 March 2026 to 08 March 2026	0830LT to 1830LT	
14 March 2026 to 15 March 2026	0830LT to 1830LT	

Table 1. List of Activity Dates, Activity Times and Operating Altitude for Proposed Unmanned Aircraft Operations

2. The Operator shall only operate the unmanned aircraft within the scope of this Permit and the Unmanned Aircraft Operator Permit (Ref. no.: UOP/0728).

3. This Permit is granted subject to the following conditions:

(a) The Operator shall take all necessary measures and precautions to ensure that the flight of the unmanned aircraft will not pose a hazard to and / or cause injury or death to persons and / or damage to properties.

(b) Without prejudice to the generality of sub-paragraph (a), such measures shall include the following:

i. The Operator shall ensure that the unmanned aircraft operations are confined within the specified operating site as submitted, and that the operating altitudes shall not exceed 183ft AMSL. **The Operator shall also ensure that an adequate safety distance is maintained around the operating site at all times, and that the unmanned aircraft does not overfly all persons, public roads, vehicles and structures that are not involved in the UA activity.** These requirements shall apply to all phases of flight, including the launch and recovery of the unmanned aircraft, and in the event of a lost link situation between the pilot and the unmanned aircraft;
ii. The Operator shall ensure that no more than one unmanned aircraft is airborne at any one time;
iii. The Operator shall ensure that the Remote Pilot or Remote Observer(s) maintains visual contact with the unmanned aircraft at all times;
iv. The Operator shall ensure the Remote Observer(s) shall relay critical flight information and assist the Remote Pilot in maintaining safe separation from any static or dynamic obstacles;
v. The Operator shall ensure that the Remote Pilot and the Remote Observer(s) are adequately trained to perform EVLOS operations;
vi. The Operator shall ensure enhanced lighting on its unmanned aircraft for greater visibility for night/low-light operations;
vii. The Operator shall maintain sufficient separation with other unmanned aircraft operating within the same area of operation or flight area if any;
viii. The Operator shall ensure that during the conduct of automatic/semi-autonomous operations, the pilot shall maintain or be able to take over control of the unmanned aircraft if required to ensure safety;
ix. The Operator shall not fly its unmanned aircraft will in a manner that will interfere with the emergencies or public transport providers and shall not endanger or distract members of public;
x. The Operator shall ensure that the unmanned aircraft obtains 10 GPS Satellites lock prior to launch;
xi. The Operator shall set 183ft AMSL and 100m radius as the “geo-fencing” boundary (centred on each launch point);
xii. The unmanned aircraft shall not be flown for longer than 85% of the maximum endurance of the model of unmanned aircraft deployed and an appropriate crew rest cycle for the UA pilot shall be adhered to at all times; and

xiii. The Operator shall cease the unmanned aircraft flight, if necessary, or if any of the safety features becomes inoperative. The safety features shall include but not limited to the following:

a. Radio Control Channel
b. Telemetry Control Channel
c. Return-to-home failsafe function as installed on the unmanned aircraft and control sets;
d. Software coded geo-fencing as set per (xi) above;
e. Software coded “Hover & land autonomously” failsafe function on the unmanned aircraft.

4. The Operator must submit the information required under the tab “Flight Request” in the Centralised Flight Management System (CFMS) FlyItSafe mobile application immediately before commencing the unmanned aircraft flight. After the unmanned aircraft flight has ceased, the Operator shall “End” the flight in the CFMS FlyItSafe mobile application.

   In the event of inaccessibility or malfunction of CFMS or FlyItSafe mobile application, the operator shall inform / seek positive clearance from the CAAS Operations Command and Control Centre (OCC) (Tel. No.: 6241 1292) and the RSAF Sembawang Tower Duty Controller (Tel. No.: 6750 8088) on the operating height and area of operation, at least 15 minutes prior and inform again when the unmanned aircraft flights have ceased. The Operator shall also provide the flight controller number and serial number of the unmanned aircraft system for CAAS' verification purposes. The CAAS/RSAF could also make calls to verify if the operator is operating at the approved location, without prior notification.

5. Other than geo-fencing, the Operator shall also set the operating altitude to no higher than approved height given by RSAF, including contingency mode like Return-To-Home (RTH)) to avoid fly away of the unmanned aircraft.

6. The Operator shall ensure that the designated on-site personnel (Roody Bin Sukayman, +6590083824 and Daniel Lim En Quan, +6583995264) remain contactable at all times whenever the unmanned aircraft is flown.

7. The Operator shall be solely responsible for the safe conduct of the unmanned aircraft flights.The Operator shall cease the flying operations within five (5) minutes upon notification by CAAS/RSAF/SPF. The CAAS/ RSAF/SPF reserves the right to cancel this clearance, should the need arise, without prior notification.

8. This Permit shall not be transferred to any person and any purported transfer of the permit in contravention of this condition shall be void and of no effect.

9. This Permit may be withdrawn at the discretion of CAAS.

10. The Operator is reminded that photography or videography of Protected Areas or Protected Places without the permission of the authority of that Protected Area or Protected Place is an offence under the Infrastructure Act 2017 (IPA). The Operator is expected to seek permission from the relevant authority before the commencement of flight **if there is a need to capture photography / videography of Protected Areas or Protected Places**. The list of Protected Areas or Protected Places may be found at SPF’s IPA webpage (https://www.police.gov.sg/Advisories/Infrastructure-Protection/Protected-Areas-and-Protected-Places). The Operator is also reminded to check if they are operating the unmanned aircraft within proximity of Protected Areas under the Air Navigation Act (ANA) and to be mindful of the boundaries stated in One Map. The Operator shall alert the CAAS UAS Duty Officer (Tel: 6241 1292) immediately upon any intrusion of the unmanned aircraft into the boundaries.

11. This Permit does not permit the operation of any unmanned aircraft within a Temporary Restricted Area (TRA) that may be established during the validity period of this Permit. A separate Class 1 Activity Permit must be obtained in order to carry out an activity within the TRA.
